Avast Premium Security for Mac

This is advanced real-time protection, crafted for your Mac

Stop malware for Mac

Viruses, spyware, keyloggers, fake websites — the world's largest threat detection network blocks attacks to your Mac before they can even strike.

End ransomware threats

Wall off photos, documents and personal files against criminals who'd hijack them for money. Now nobody can alter what's yours, in any way, until you say so.

Shield your privacy online

A safe Mac is essential. A safe you, even more so. Get instant alerts for network and router weaknesses, eavesdroppers, device hackers, unsafe sites and web trackers.

Here's how Avast Premium Security measures up

	AVAST PREMIUM SECURITY	AVAST SECURITY
Block viruses and other malware Detect viruses, spyware, and other threats in real time.	✔	✔
Stay safer online Be warned of unsafe sites and block intrusive web trackers.	✔	✔
Scan for Wi-Fi security weaknesses Find potential weak spots in your home network and router.	✔	✔
Get real-time Wi-Fi security alerts Be instantly alerted to network weaknesses and intruders.	✔	
Stop ransomware Keep personal photos and files safe from unwanted changes.	✔	
Avoid fake websites Stop session hijacking to keep your data safe.	✔	

There's so much more under the lid

Real-time shields

- File Shield detects and blocks any malware that hits your Mac's hard drive.
- Web Shield looks after your browsing, stopping web-based malware and phishing attempts.
- Real Site protects your connection to ensure your session isn't hijacked and redirected maliciously by hackers.
- Mail Shield removes all malicious email attachments.
- Ransomware Shield walls off any file or directory against attempts to alter them in any way.

Scanning

- Schedule scans of your whole hard drive, or a particular area. Would you rather run one manually? You have the power.

Automatic updates

- Avast Threat Labs releases updates almost every 5 minutes — and bigger, regular updates twice a day.
