

Avast SecureLine VPN

Military-grade privacy protection for up to 5 devices

Enjoy complete privacy online

Encrypt the data you send from your PC or mobile device, hide your IP address and everything you do online from ISPs, hackers, and your local coffee shop

Secure every hotspot

Fearlessly connect to any public or private Wi-Fi, secure in the knowledge no spies will be able to see your online activity or steal your data.

Access everything on the go

Circumvent geo-blocks and government censorship by routing your traffic through different nations around the world for unrivaled online freedom.

For Windows 10, 8, 8.1, 7 SP1, Mac OS 10.10+, iOS 11+, and Android 5+

What is a VPN?

When you browse, you're broadcasting your online activities, giving away critical information about yourself, such as your location. Avast SecureLine VPN helps secure your data with 256-bit AES encryption to prevent advertisers, employers, government agencies, and hackers from eavesdropping on what you do.

Do I need a VPN?

If you want to freely, safely, and privately enjoy the internet, then yes. A VPN will securely connect you to any network, and let you visit any website, no matter where you go or what you do.

Do you use free Wi-Fi?

Access your bank account and go shopping safely from wherever you connect.

Not in the office?

The same security big companies use to protect their workers is now available to you.

Seeing the world?

Keep up with your favorite websites and TV shows no matter where you are.
