

AVG BreachGuard

Protect your personal info from data breaches & collection by third parties.

24/7 privacy risk monitoring

Monitor the web non-stop for your leaked personal info.

Online personal info removal

Stop your info from being collected and exploited by third parties.

Privacy-boosting tips

Get advice on how to make the information on your online accounts more private.

System requirements:

Microsoft Windows 7, 8, 8.1 or 10; 1GB RAM or above; 500 MB of disk space on a hard drive (HDD/SSD) and internet connection to use

Stay ahead of hackers and keep your personal info in your own hands

AVG BreachGuard is an advanced privacy solution that prevents your personal info from being exploited online for profit — and out of the wrong hands.

Easily manage your privacy

Get step-by-step advice that makes it easy to adjust the privacy settings of your online accounts to your desired privacy level to reduce how much info you share with major companies.

Reclaim your personal info from data brokers

Data brokers and online marketers collect your online activities and sell it to other companies that can take advantage of it. BreachGuard gives you the control to stop them from collecting your information before this happens, and remove it from their databases.

Get round-the-clock privacy risk monitoring

BreachGuard monitors the web 24/7 for your leaked personal information. If a hacker gets a hold of your personal information and posts it on the web, we spot the hack and tell you how to protect yourself.
